

# Global Maritime Week - 2<sup>nd</sup> Edition

20-21 January 2021

Excerpts from an interview with  
**Jan Hoffmann** | Chief, Trade Logistics Branch,  
Division on Technology and Logistics | UNCTAD

As we move into 2021 what do you see as the key priorities for the Maritime sector and your company?

Two key challenges for ports and shipping beyond 2021 are Decarbonization and Digitalization. Both benefit each other, and both have received a push from the COVID-19 pandemic. Especially the digitalization has advanced as Customs, port and maritime authorities have pushed for more paperless solutions, such as automation, pre-arrival processes, and electronic submissions and payments. The challenge is not to lock-in the progress made during lock-down.
